(54) Title: MANAGEMENT OF THE DIVERT FACILITY OF A COMMUNICATION DEVICE

(57) Abstract: The invention relates to a method for managing, in a data communication network (11), communication addressed to a wireless communication device (10.1). The wireless communication devices (10.1 - 10.3) communicating in the data communication network (11) are equipped with at least one identifier (IMS11 - IMS13) and in which, the communication device is equipped with a control feature of a divert facility (30.2), in order to control the divert facility (12.1) concerning itself, and in which communication addressed to at least one communication device (10.1) defined by a first identifier/identifiers (IMS11) is routed at least partly to at least one communication device (10.2) defined by a second identifier/identifiers (IMS12). In the method the control feature of the divert facility (30.2) of the communication device (10.1) defined by the first identifier/identifiers (IMS11) is remotely controlled using some second communication device.
